1 Introduction

This file is a description of Mobile App EronSante. The goal of this file is to describe all steps from specifications, wireframe, mockup, workflow, code developed management method, softwares use, perspectives

The main goal of this app is to offer for users the possibility to : discover courses medical education , to buy or ask more information about these courses, connect to their account in order complete their training, see their progression, deadline monitoring and also information about EronSante company.

2 Management method

Below is every human resources with their duties/functions need to know in order to manage the project :

- Direction:
 - Damien Vert (chef executive) : damien.v@eronservice.fr
 - Arthur Balme (chef executive) : arthur.b@eronservice.fr
 - Fabien Direction ERON / EFIA : fabien.balme@gmail.com
- Administrative / Financial Manager
 - Philippe Vert : daf@eronservice.fr
- Communication:
 - Louis Serge Real del Sarte : lsdelsarte@eronservice.fr
 - Alexandra Lages : alexandralages1@gmail.com
- Teaching Manager:
 - Marielle Glikpo : marielle.g@eronservice.fr
 - Bouchra : resp.pedago@eronservice.fr
- IT manager:
 - Bryan Lebar : bryan.l@eronservice.fr
- Developper Partner :
 - Thomas Berton : thomas.berton83@gmail.com
 - Alex Iasoni : alex.iasoni25@gmail.com

In order to success to build the app, we are using **Agile method (Scrum)** (sprint's time to be define but pribably 2 weeks) with software **trrello**. Also

Thomas Berton and Alex Iasoni ask ERON to communicate via WhatsApp about the App and Website/CRM. Trello board named : "Appli Mobile".

3 Specifications

3.1 Company Eron

ERON Santé is a company in continuing education for medical personal online. Profession fields target are : Doctors, Dentists, Nurses, Physiotherapists and Pharmacists.

Training courses number are estimated at more than 5000 .

Certification Qualiopi, Datadock, AFAQ 9001 are all gets by ERON Santé which is a proof of high quality training.

6 days / 7 days of availability to advice learner medical employees.

Bloc skills are built and think with expert in order to offer the best training for their learner.

Thanks to their huge social network ERON Santé , gets more than **1 million of users**.

Functionning of the company is articulated with 2 main players : **Professional trainers** and **Health Professional liberals**.

- **Health Professional liberals** gets 14 credits (14Hours) paid by the State and which is managed by **Développement Professionnel Continu(DPC)** and they can also get training paid by **Union nationale des professions libérales UNPL** which have the **Fonds interprofessionnel de Formation des Professionnels libéraux (FIFPL)** . To get those formations financed by State and FIFPL **EronSanté** use the **Commercial website** (describe below) Finally the **Health Professional liberals** can also choose to pay

by theirself training offer by **EronSanté** on the website **Gafeo** (describe below)

Their commercial website is built with **CMS Wordpress** and gets 5 main view

:

- Home [website](#)

The **customer relationship management (CRM)** is **dolibarr** and provide by **open-dsi**. **Dolibarr** is write with **Python language**. [Link to Website](#).

3.2 Objective qualitative of Application

The company EronSanté's need/requirement to creat a mobile application from scratch was born by mutlitple facts :

- More and more feedback from users/learners using website would like to get their training courses on mobile or tablet.
- Company startegy is to :
 - increase fidelity of their learners by allow learners to follow their training session on mobile or tablet
 - target younger health professionnall (currently main users are 40-50 years old)
 - In the future to create a "Eron Academy" where learners invest trust in EronSnaté based on philosophy/idea and keep users longer such as vision of 3 years

3.3 Customer/User target

Here are information about profile users of Application EronSanté, based on usual users on current website and on strategy company :

- Persona Learner :
 - Age : >40 years old
 - Experience work : many years
 - Profession type : Doctors, Dentists, Nurses, Physiotherapists and Pharmacists
 - Platform device : tablet, smartphone
 - View picture persona in section [Appendices](#)
- Persona visitor :
 - Age : 20 -30 years old
 - Experience work : Juniors
 - Profession type : Doctors, Dentists, Nurses, Physiotherapists and Pharmacists
 - Platform device : tablet, smartphone
 - View picture persona in section [Appendices](#)

3.4 Quantitative objectives

- Target number of download on Store App ?
- Target of typeform filled with the app
- Target number of users complete lesson with app

3.5 Project's Scope

- Language App : French
- Language Programmation :
 - FrontEnd Framework : ReactNative was choose at the beginning with ERON Team. After meeting on 2nd of June 2021 with 2 developer Thomas Berton and Alex Lisoni , they ask us to change and use Angular Ionic;
 - Software Development: AndroidStudio and XCode
 - Compiler and bundler : Expo
- Platform : iOS / Android
- Devices app run on : tablet , Smartphone
- Type of Application : showcase/ Learning / Shop
- Module of website to integrate :
 - News
 - Shop (from FIFPL or Dcp)
 - * typeform
 - Catalogues
- App screens and features :
 - Home screen (everybody) with :
 - * Training by category
 - * News
 - * Contacts
 - * FAQ

- Login screen (learner):
 - * Profil screen:
 - Notification (date start and end of training session) (features)
 - Contacts
 - FAQ
 - * Personnal Training (screen)
 - Sumup /progress (screen)
 - List of training susbscribe (screen)
 - * Shop screen with 3 steps (features) and only paid by personal founds :
 - User information
 - Order's details
 - secured payment
- App functions: The app will allow user to see catalogues, news EronSanté, login (if they follow courses), see details of their training (start-end date session, number of hour spend, percentage completion),read and complete module training, to be redirect to shop training link with Dpc account.

3.6 Design and Ergonomy

3.6.1 Wireframe

To list all of features needed for the Application we describe User stories:

- As a **learner** I want to **connect with my login and password** so that I can **access to my personnal account**.
- As a **Learner** I want to **access to my lessons on smartphone/tablet** so

that I can **complete training's module easily and everywhere**

- As a **Learner** I want to **be notified when the deadline is coming** so that I can **finish training in time**
- As a **Learner** I want to **see sumup of all my training** so that I know **more about my training progress**
- As a **Learner** I want to **contact customer service** so that I can **get more informations, no available in the App FAQ**
- As a **Visitor** I want to **see informations about ERON** so that I can **contact them**
- As a **Visitor** I want to **see all training offer by ERON** so that I can **Subscribe to training session with DPC or FIFPL credits**
- As a **Visitor** I want to **know news about my job** so that I can **get information about my job directly on my smartphone**

3.6.2 Mockup

Figma will be used in order to design mockup.

4 Code App

5 Appendices

PERSONA : ELISE AUDART DENTISTE (APPRENANTE)

Nom : Audart

Prénom : Elise

Âge : 40 ans

Situation sociale : Dentiste à son compte

Adresse : 11 Bd Lazaret 11000

Personnalité : Dynamique, Curieuse

Profil : Elise est très active rarement chez elle . Elle est passionnée par son métier et est attentive aux webinar et formations liés à son métier

Utilisation du produit : Elle est apprenante chez EronSanté et a l'habitude de s'informer et de se former via sa tablette ou son smartphone. Elle souhaite pouvoir continuer à se former à distance en téléchargeant l'application Eron Santé.

Objectifs / problèmes résolus par le produit : Une application comme celle envisagée par Eron Santé lui permettrait de pouvoir suivre les dernières actualités , de se former sur des thématiques liées à son métier sans devoir effectuer ses formations en présentiel ou sur un ordinateur, appareil qu'elle ne possède pas chez elle.

PERSONA : YVES MAUNIER MEDECIN JUNIOR (VISITEUR)

Nom : Maunier

Prénom : Yves

Âge : 27 ans

Situation sociale : Jeune docteur faisant parti d'un cabinet médical

Adresse : 10 Rue pontel 76000

Personnalité : Ambitieux, Curieux et Motivé

Profil : Il souhaite acquérir de l'expérience pour pouvoir se lancer seul, acheter son propre cabinet et avoir un réseaux de patients conséquent

Utilisation du produit : Grâce à l'aide de l'État (Agence nationale du dpc) Yves a le droit à 14 crédits par an pour se former à des thématiques liées à son métier de Médecin. Yves préfère utiliser un smartphone ou une tablette pour se former.

Objectifs / problèmes résolus par le produit : Les formations proposées par Eron Santé correspondent à ce qu'il recherche mais peuvent être suivies, pour le moment, seulement via un ordinateur sur site web. L'UX du site web n'est pas suffisamment développé pour être totalement « responsive » sur téléphone et peut être un frein pour Yves dans son choix d'organisme de formation

6 To discuss and to validate

Questions / Matter of discussion	Context of
Does the learner will get directly the training activated after the payment ?	Wireframe
Another tab for shop to let the learner by training	Wireframe
How precisely the learner could choose to be notified for deadline training ?	Wireframe

7 External resources
